

Astro_up CC

Astro_up BP

channel activity

monoatomic ion channel activity

chloride transmembrane transporter activity

monoatomic cation channel activity

passive transmembrane transporter activity

GABA-gated chloride ion channel activity

monoatomic anion transmembrane transporter activity

potassium ion transmembrane transporter activity

metal ion transmembrane transporter activity

inorganic anion transmembrane transporter activity

voltage-gated sodium channel activity

delayed rectifier potassium channel activity

GABA receptor activity

GABA-A receptor activity

myosin V binding

myosin
V
binding

Inhib_down BP

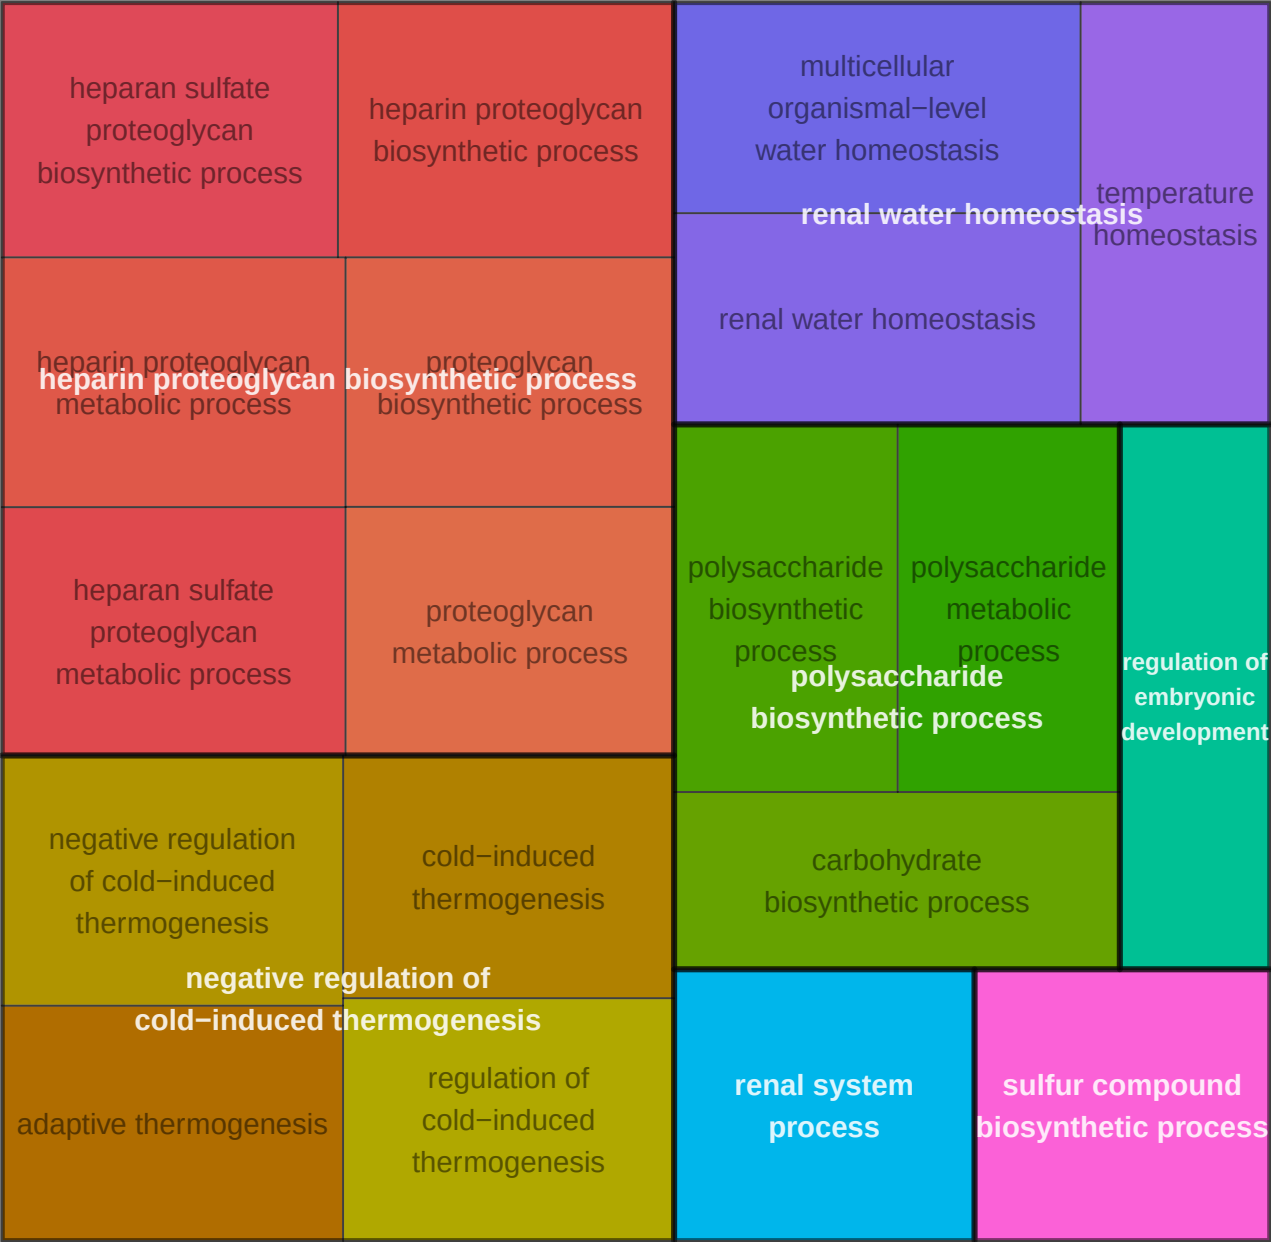

axon ensheathment in central nervous system

oligodendrocyte differentiation

central nervous system myelination

oligodendrocyte
differentiation

Inhib_up BP

Inhib_up MF

heparan sulfate
sulfotransferase
activity

sulfotransferase activity

carboxylic ester
hydrolase activity

heparan sulfate sulfotransferase activity

proteoglycan
sulfotransferase
activity

transferase
activity,
transferring
sulphur-containing
groups

extracellular matrix
structural constituent

microfilament
motor activity

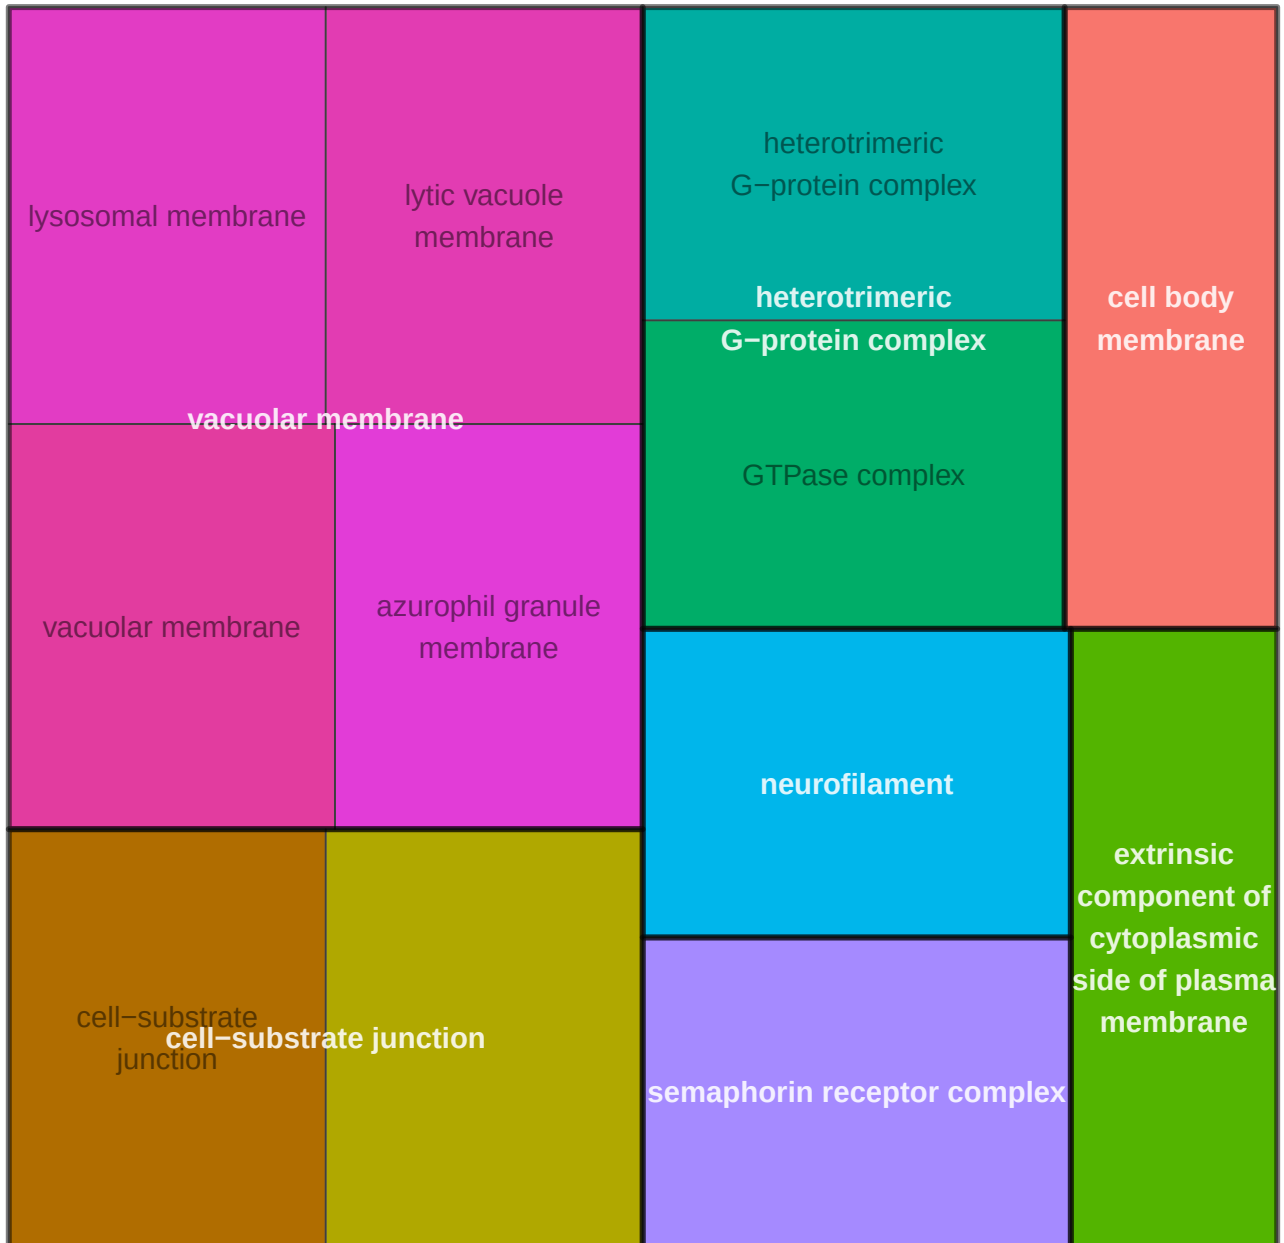

cytoskeletal
motor activity

deacetylase activity

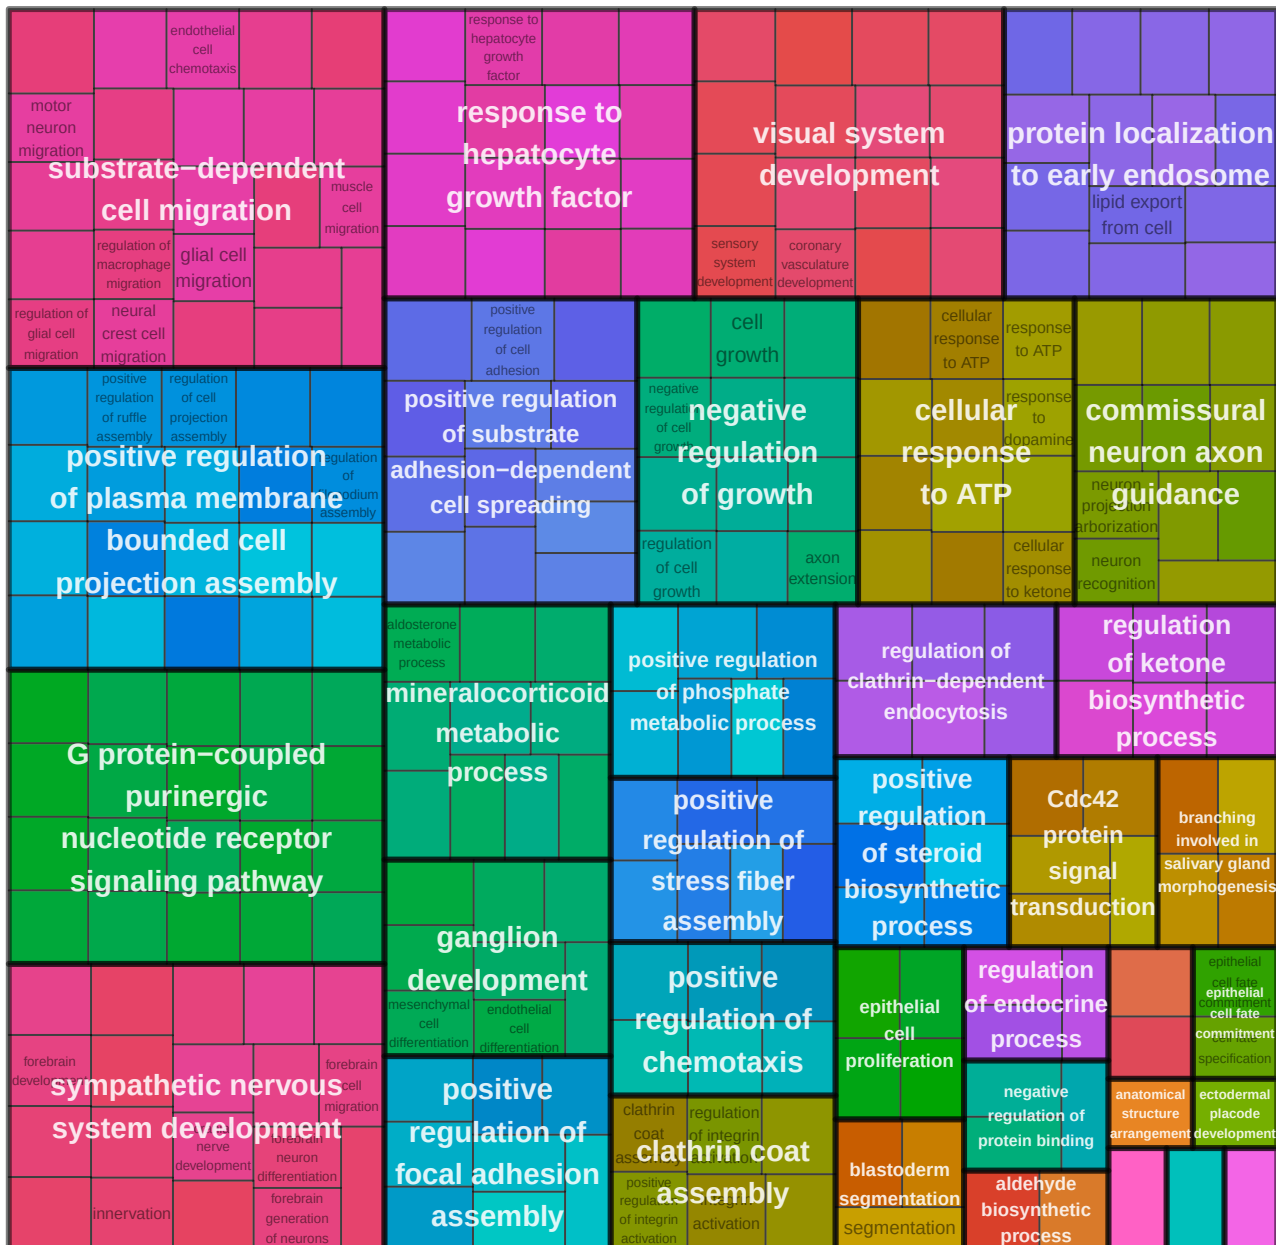

actin filament binding

calmodulin binding

Macro_down CC

Macro down BP

Macro_down MF

Micro_down BP

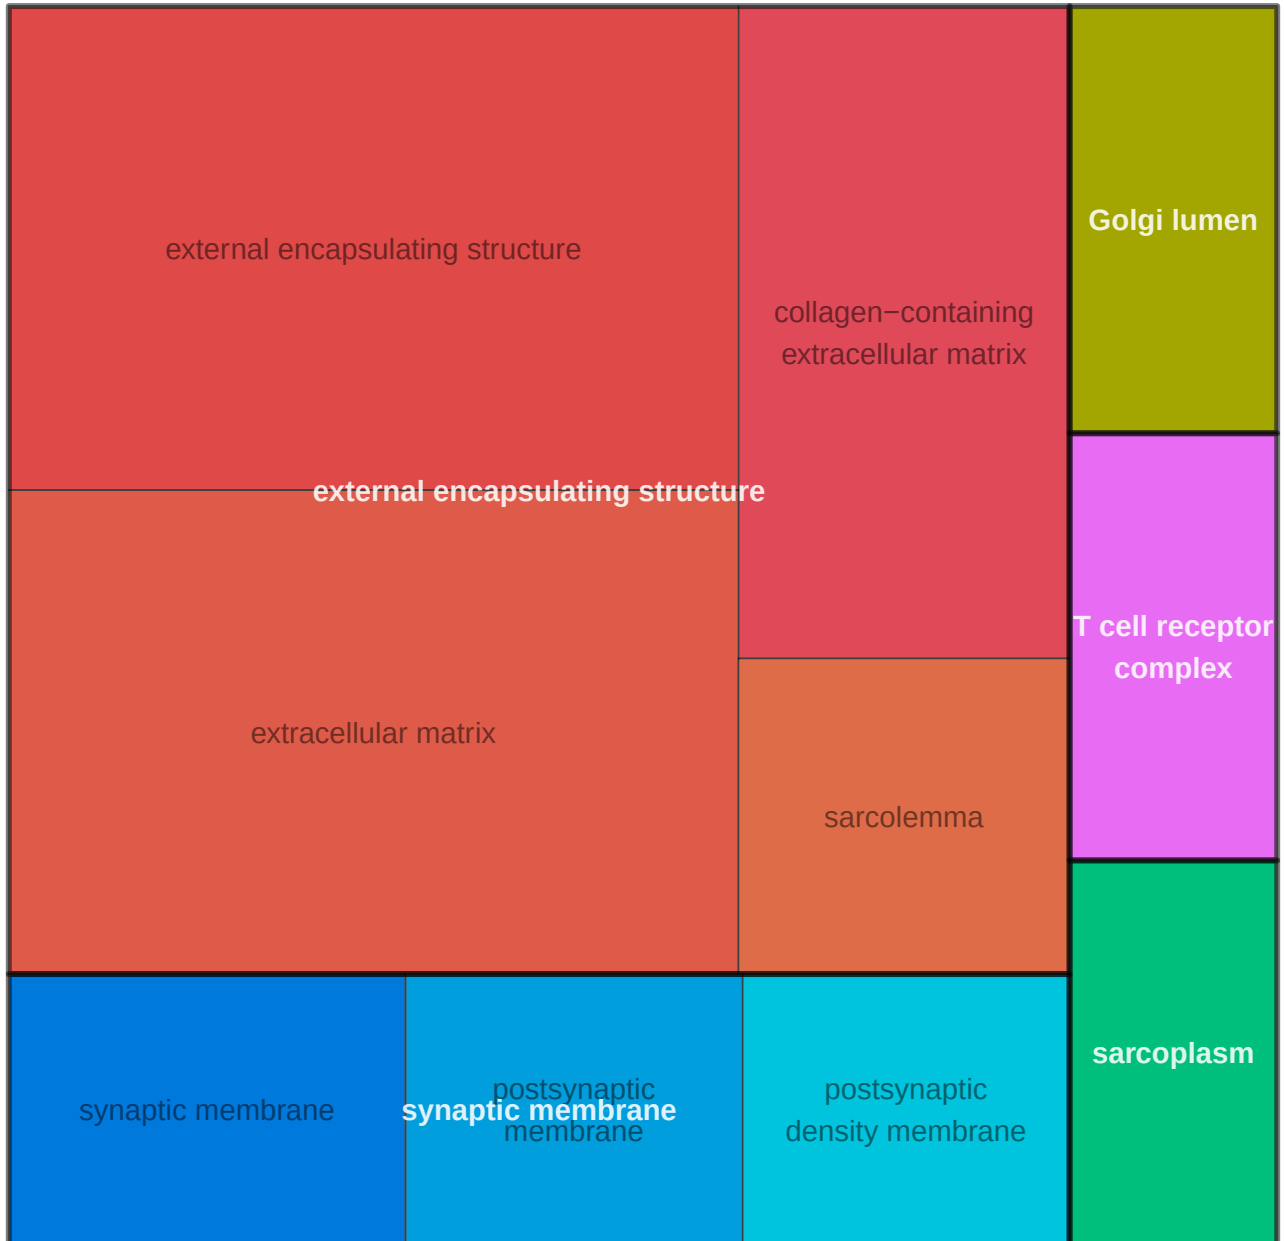

Oligo_down CC

early endosome membrane

early endosome

Oligo_up CC

Oligo_up BP

Oligo_up MF

collagen binding

high voltage-gated
calcium channel activity
