

Astro-1_up CC

G protein-coupled receptor complex

postsynaptic membrane

GABA receptor complex

synaptic membrane

GABA receptor complex

synaptic membrane

Astro-1_up BP

negative regulation of
adenylate cyclase activity

negative regulation of lyase activity

negative regulation of lyase activity

regulation of
adenylate cyclase
activity

**gamma-aminobutyric
acid signaling pathway**

lipid import into cell

synaptic vesicle docking

synaptic vesicle docking

vesicle docking
involved in exocytosis

Astro-1_up MF

Astro-2_up MF

Astro-3_down CC

myelin sheath

myelin sheath

compact myelin

Astro-3_down BP

axon ensheathment

ensheathment of neurons

iron ion
transport

myelination

**iron ion
transport**

myelination

myelin assembly

regulation of
vesicle-mediated
transport

substantia nigra development

Astro-3_up CC

Astro-3_up MF

acetylcholine receptor activity

G protein-coupled
neurotransmitter
receptor activity

G protein-coupled
receptor activity

GABA receptor activity

G protein-coupled amine
receptor activity

GABA receptor activity

**protein
tyrosine
kinase
activator
activity**

phosphatidylinositol
phospholipase C activity

phospholipase C activity

phospholipase C activity

Excit-L2_5-mix_down CC

dendritic spine

neuron spine

neuron spine

bioactive lipid receptor activity

neuropeptide receptor activity

G protein-coupled peptide receptor activity

peptide receptor activity

acid-thiol ligase activity

CoA-ligase activity

ligase activity, forming carbon-sulfur bonds

phosphatidylinositol-3,4,5-trisphosphate binding

phospholipid binding

bHLH transcription factor binding

signaling receptor complex adaptor activity

peptide hormone binding

hormone binding

G-protein alpha-subunit binding

receptor tyrosine kinase binding

PDZ domain binding

PDZ domain binding

Excit-L2_5-RELN_down CC

Excit-L2 5-RELN down BP

proton motive force-driven mitochondrial ATP synthesis	purine ribonucleoside triphosphate biosynthetic process	ribose phosphate biosynthetic process	ATP metabolic process	nucleotide biosynthetic process	response to oxygen levels	response to decreased oxygen levels
proton motive force-driven ATP synthesis	ribonucleoside triphosphate biosynthetic process	purine ribonucleoside triphosphate metabolic process	nucleoside triphosphate metabolic process	nucleoside phosphate biosynthetic process	response to hypoxia	response to hyperoxia
ATP biosynthetic process	nucleoside triphosphate biosynthetic process	purine nucleoside triphosphate metabolic process	purine ribonucleotide metabolic process	ribose phosphate metabolic process		response to increased oxygen levels
purine nucleoside triphosphate biosynthetic process	ribonucleotide biosynthetic process	ribonucleoside triphosphate metabolic process	ribonucleotide metabolic process	purine nucleotide metabolic process		
				nucleotide metabolic process		
oxidative phosphorylation	ATP synthesis coupled electron transport	cellular respiration	electron transport chain		mitochondrial respiratory chain complex I assembly	proton transmembrane transport
aerobic electron transport chain	mitochondrial ATP synthase coupled electron transport	cellular respiration by oxidation of organic compounds	mitochondrial electron transport, NADH to ubiquinone			
aerobic respiration	respiratory electron transport chain	generation of precursor metabolites and energy	mitochondrial electron transport, cytochrome c to oxygen		response to ethanol	response to oxidative stress
					response to alcohol	positive regulation of defense response to virus by host

Excit-L2_5-RELN_down MF

Excit-L2_5-RELN_up CC

Excit-L2_5-RELN_up BP

Inhib-SST_down CC

cytosolic large ribosomal subunit

large ribosomal subunit

cytosolic ribosome

ribosomal subunit

cytosolic ribosome

ribosome

Inhib-VIP_down BP

axon ensheathment in
central nervous system

axon ensheathment in central nervous system

Macro_down CC

Macro_down BP

Macro_down MF

Micro-4_up CC

Micro-4_up BP

modulation of chemical
synaptic transmission

regulation of trans-synaptic signaling

regulation of trans-synaptic signaling

Oligo-3_down CC

Oligo-3_down BP

axon ensheathment

myelination

myelination

oligodendrocyte development

ensheathment of neurons

oligodendrocyte differentiation

Oligo-3_up CC

Oligo-3_up BP

Oligo-3_up MF

Oligo-5_down MF

phosphatidic acid binding

phosphatidylinositol-3,4,5-trisphosphate binding

ATP hydrolysis activity

phosphatidylinositol-3,4-bisphosphate binding

phosphatidylinositol-3,4-bisphosphate binding

phosphatidylinositol-3,5-bisphosphate binding

microfilament motor activity

channel inhibitor activity

ion channel inhibitor activity

sodium channel regulator activity

sodium channel regulator activity

neuropeptide receptor activity

racemase and epimerase activity

Oligo-5_up CC

membrane microdomain

membrane microdomain

membrane raft

immunological synapse

Oligo-5_up BP

Oligo-5_up MF

Vasc-VLMC_down MF
