Astro_up_AA MF

metal ion transmembrane transporter activity		channel activity		passive transmembrane transporter activity		monoatomic ion channel activity		ionotropic glutamate receptor binding	
sodium ion transmembrane transporter activity	voltage-gated sodium channel activity		inorganic anion transmembrane transporter activity		voltage-gated channel activity		voltage-gated monoatomic ion channel activity		GABA receptor activity
	chloride transmembrane transporter activity		secondary active transmembrane transporter activity		transmitter-gated channel activity		transmitter-gated monoatomic ion channel activity		
monoatomic cation channel activity	gated channel activity		GABA-gated chloride ion channel activity		symporter activity		calcium ion transmembrane transporter activity		GABA-A receptor activity
	monoatomic anion transmembrane transporter activity		extracellular ligand-gated monoatomic ion channel activity		voltage-gated monoatomic cation channel activity		potassium ion transmembrane transporter activity		
channel regulator activity		calcium ion sensor activity		molecular sensor activity		ion channel regulator activity		clathrin binding	
channel regulator activity		channel regulator activity		channel regulator activity		channel regulator activity		calcium-dependent phospholipid binding	
channel regulator activity		channel regulator activity		channel regulator activity		channel regulator activity		myosin V binding
