GO Enrichment: CC − Oligo
dystrophin−associated glycoprotein complex
glycoprotein complex
sarcolemma
postsynaptic membrane
transport vesicle
synaptic membrane
nuclear outer membrane
organelle outer membrane
outer membrane
nuclear membrane
nuclear envelope
myelin sheath
main axon
node of Ranvier
neuromuscular junction
cell cortex
receptor complex
extracellular matrix
external encapsulating structure
collagen−containing extracellular matrix
membrane raft
membrane microdomain
lamellipodium membrane
integrator complex
collagen type IX trimer
FACIT collagen trimer
immunological synapse

GO Enrichment: BP − Oligo
muscle contraction
muscle system process
regulation of ferroptosis
ferroptosis
cholesterol biosynthetic process
secondary alcohol biosynthetic process
sterol biosynthetic process
ensheathment of neurons
axon ensheathment
myelination
central nervous system myelination
axon ensheathment in central nervous system
modulation of chemical synaptic transmission
regulation of trans−synaptic signaling
cell−substrate adhesion
extracellular matrix organization
extracellular structure organization
positive regulation of cell adhesion
T cell activation
snRNA 3'−end processing
snRNA processing
snRNA metabolic process
RNA 3'−end processing
regulation of transcription elongation by RNA polymerase II
antigen receptor−mediated signaling pathway
T cell receptor signaling pathway
activation of immune response

GO Enrichment: MF − Oligo
hydrolase activity, acting on ether bonds
ether hydrolase activity
oxidoreductase activity, acting on the CH−CH group of donors, NAD or NADP as acceptor
NADP binding
oxidoreductase activity, acting on the CH−CH group of donors
phosphoric ester hydrolase activity
extracellular matrix structural constituent
metal ion transmembrane transporter activity
GTPase regulator activity
nucleoside−triphosphatase regulator activity
calcium channel activity
protein kinase activity
transmembrane receptor protein tyrosine kinase activity
vascular endothelial growth factor receptor activity
transcription coactivator binding
transcription coregulator binding

GO Enrichment: BP − Excit
benzene−containing compound metabolic process
positive regulation of positive chemotaxis
regulation of positive chemotaxis
cellular response to low−density lipoprotein particle stimulus
response to lipoprotein particle
cellular response to lipoprotein particle stimulus
adenylate cyclase−inhibiting G protein−coupled glutamate receptor signaling pathway
G protein−coupled glutamate receptor signaling pathway
glutamate receptor signaling pathway
regulation of synaptic transmission, glutamatergic
adenylate cyclase−inhibiting G protein−coupled receptor signaling pathway
positive regulation of vascular wound healing
regulation of NK T cell differentiation
positive regulation of fibroblast growth factor receptor signaling pathway
positive regulation of vascular endothelial growth factor signaling pathway
NK T cell differentiation
positive regulation of chondrocyte differentiation
chondrocyte differentiation
cartilage condensation
cell aggregation
retina development in camera−type eye
