

vL1_down_AA CC

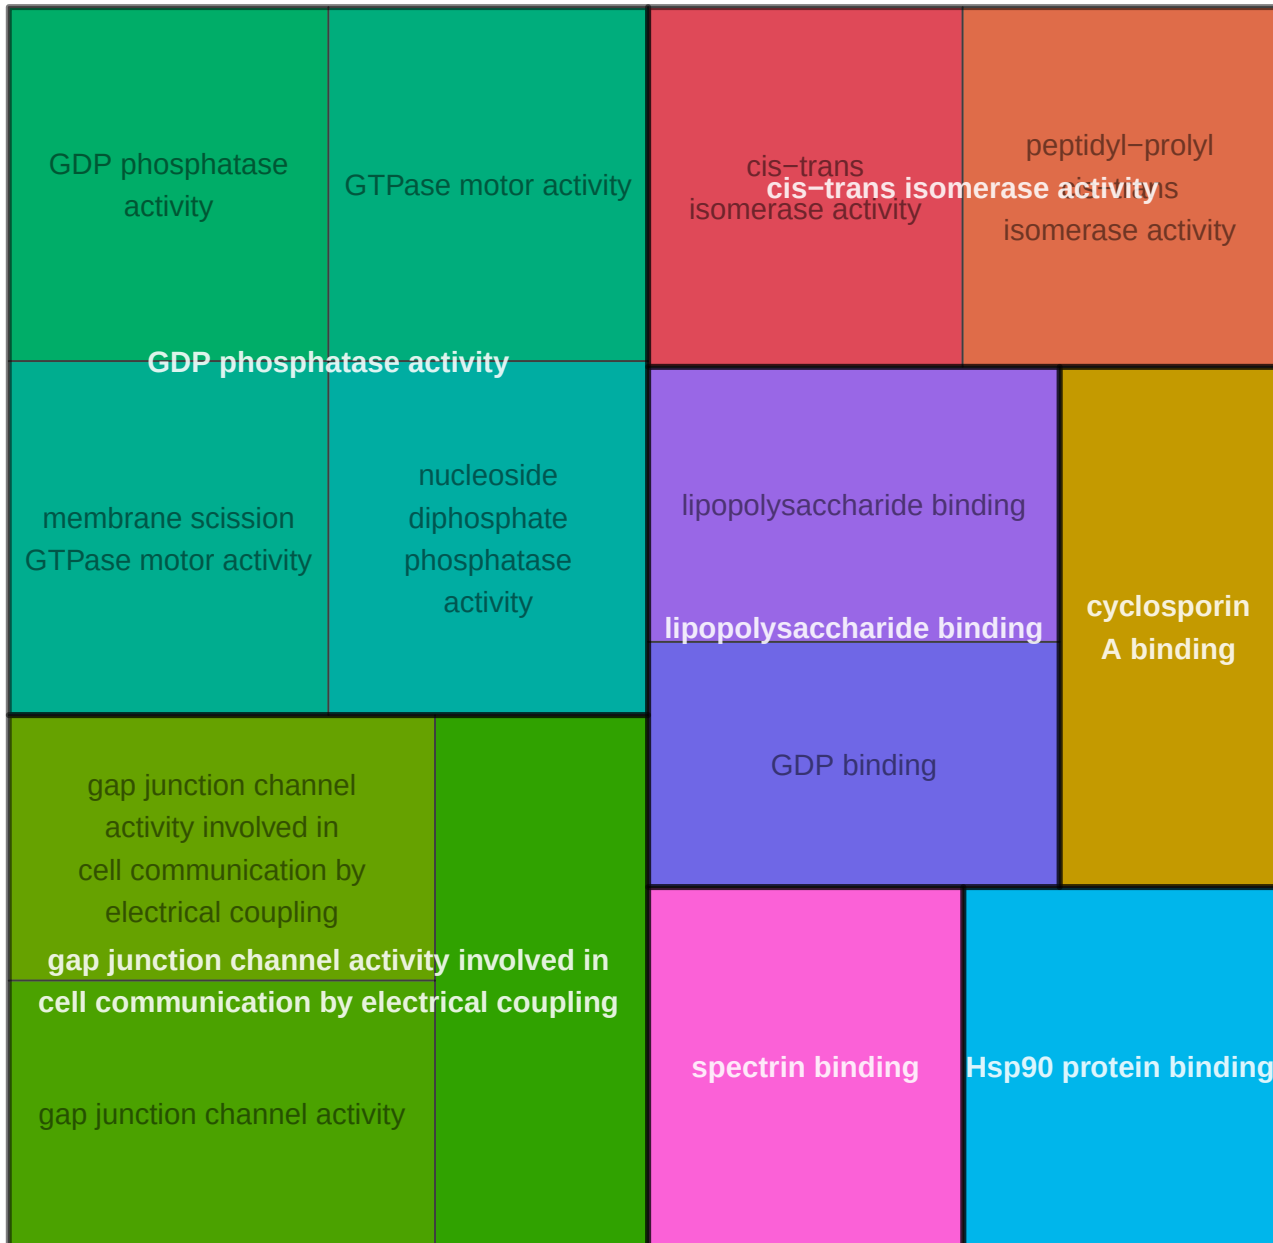

connexin complex gap junction

paranode region of axon

mitochondrial permeability transition pore complex

myelin sheath

vL1_down_AA MF

vL1_up_AA MF

vL5a_down_ALL CC

eukaryotic 43S
preinitiation complex

eukaryotic 48S
preinitiation complex

eukaryotic 48S preinitiation complex

**eukaryotic
translation
initiation
factor 3 complex**

translation preinitiation complex

vL5a_down_ALL MF

heparan sulfate sulfotransferase activity

sulfotransferase activity

glycosaminoglycan
binding

heparan sulfate sulfotransferase activity

proteoglycan sulfotransferase activity

transferase
activity,
transferring
sulphur-containing
groups

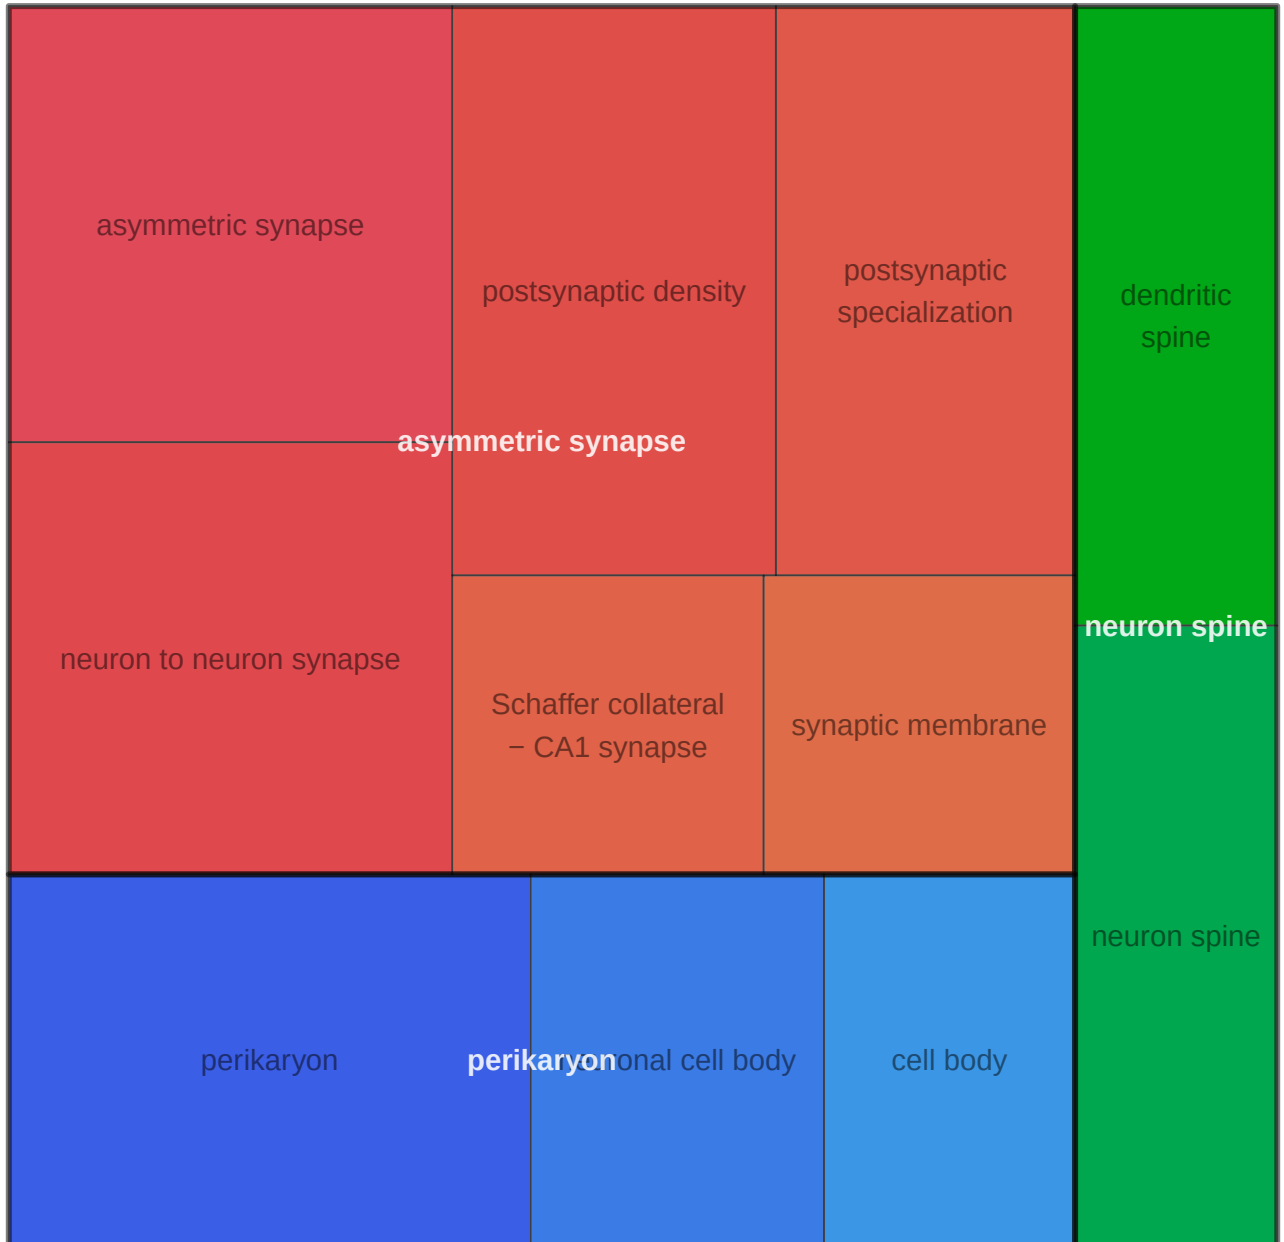

endopeptidase
inhibitor activity

peptidase
inhibitor activity
endopeptidase inhibitor activity

endopeptidase
regulator activity

translation
initiation
factor binding

vL5a_up_ALL CC

vL5a_up_ALL MF

vL6_down_ALL BP

vL6_down_ALL MF

carbohydrate transmembrane
transporter activity

ubiquitin-like protein reader activity

**carbohydrate transmembrane
transporter activity**

ubiquitin-like protein reader activity

sugar transmembrane transporter activity

ubiquitin-modified protein reader activity

vL6_up_ALL BP

adaptation of signaling pathway	desensitization of G protein-coupled receptor signaling pathway	amyloid precursor protein biosynthetic process		regulation of glycoprotein biosynthetic process
G protein-coupled receptor internalization	regulation of G protein-coupled receptor internalization	regulation of amyloid precursor protein biosynthetic process		regulation of glycoprotein metabolic process
negative adaptation of signaling pathway	positive regulation of G protein-coupled receptor signaling pathway	postsynaptic specialization assembly	regulation of presynapse assembly	negative regulation of receptor internalization
G protein-coupled adenosine receptor signaling pathway	regulation of glutamate receptor signaling pathway	synaptic membrane adhesion		negative regulation of receptor internalization
regulation of glutamate receptor signaling pathway	purinergic nucleotide receptor signaling pathway	regulation of presynapse organization	synaptic membrane adhesion	negative regulation of receptor-mediated endocytosis
G protein-coupled purinergic receptor signaling pathway		regulation of neuron projection arborization		neuron projection arborization

vL6_up_ALL MF

adenosine receptor binding

type 5 metabotropic
glutamate receptor binding

adenosine receptor binding

G protein-coupled
glutamate receptor binding

glutamate receptor binding

calcium-dependent
phospholipid
binding

dipeptidyl-peptidase activity

dipeptidyl-peptidase activity

nopeptidase activity

sphingolipid biosynthetic process	fatty acid elongation, polyunsaturated fatty acid	fatty acid elongation, saturated fatty acid	fatty acid elongation, unsaturated fatty acid	self proteolysis	negative regulation of protein sumoylation
membrane lipid biosynthetic process	membrane lipid metabolic process	linoleic acid metabolic process	very long-chain fatty acid biosynthetic process	protein autoprocessing	cellular response to salt stress
sphingolipid metabolic process	alpha-linolenic acid metabolic process	long-chain fatty-acyl-CoA metabolic process	long-chain fatty acid metabolic process	sphingosine-1-phosphate receptor signaling pathway	cellular response to salt stress
fatty acid elongation, monounsaturated fatty acid	fatty acid elongation	fatty-acyl-CoA biosynthetic process	fatty-acyl-CoA metabolic process	sphingosine-1-phosphate receptor signaling pathway	cellular response to salt stress
tissue regeneration	regeneration	muscle cell cellular homeostasis	B cell homeostasis	regulation of developmental pigmentation	skeletal muscle satellite cell activation
regulation of skeletal muscle tissue regeneration	skeletal muscle tissue regeneration	positive regulation of release of sequestered calcium ion into cytosol	T cell homeostasis	establishment of skin barrier	G1 to G0 transition
				collagen catabolic process	response to muscle activity
					positive regulation of G protein-coupled receptor signaling pathway
					sarcomere organization

vVasc_down_ALL MF

CHD-type complex	ISWI-type complex	NuRD complex	ESC/E(Z) complex
NURF complex	histone methyltransferase complex NURF complex	histone deacetylase complex	PcG protein complex
	Sin3-type complex	methytransferase complex	SWI/SNF superfamily-type complex
		ATPase complex	transcription regulator complex
transcription repressor complex	transcription repressor complex	transcription repressor complex	transcription repressor complex

ISWI-type complex

ESC/E(Z) complex

NURF complex

histone
deacetylase
complex

PcG protein complex

methyltransferase
complex

ATPase
complex

transcription
regulator complex

transcription
repressor complex

fibrillar center

nuclear chromosome

vVasc_up_ALL BP

cellular heat acclimation

cellular heat acclimation

cellular heat acclimation

negative regulation of stem
cell population maintenance

negative regulation of stem
cell population maintenance

negative regulation of
protein sumoylation

negative regulation of
protein sumoylation

regulation of
protein sumoylation

regulation of
protein sumoylation

regulation of cell
fate specification

vWMuf_down_AA BP

vWMuf_down_AA MF

cyclin-dependent protein kinase activity

cyclin-dependent protein kinase activity

cyclin-dependent protein serine/threonine kinase activity

carbohydrate transmembrane
transporter activity

vWMuf_down_ALL BP

axon ensheathment

myelination

ensheathment of neurons

myelination

vWMuf_up_AA CC

vWMuf_up_AA BP

vWMuf_up_AA MF

cyclin-dependent protein kinase activity

neuroigin family protein binding

cyclin-dependent protein kinase activity

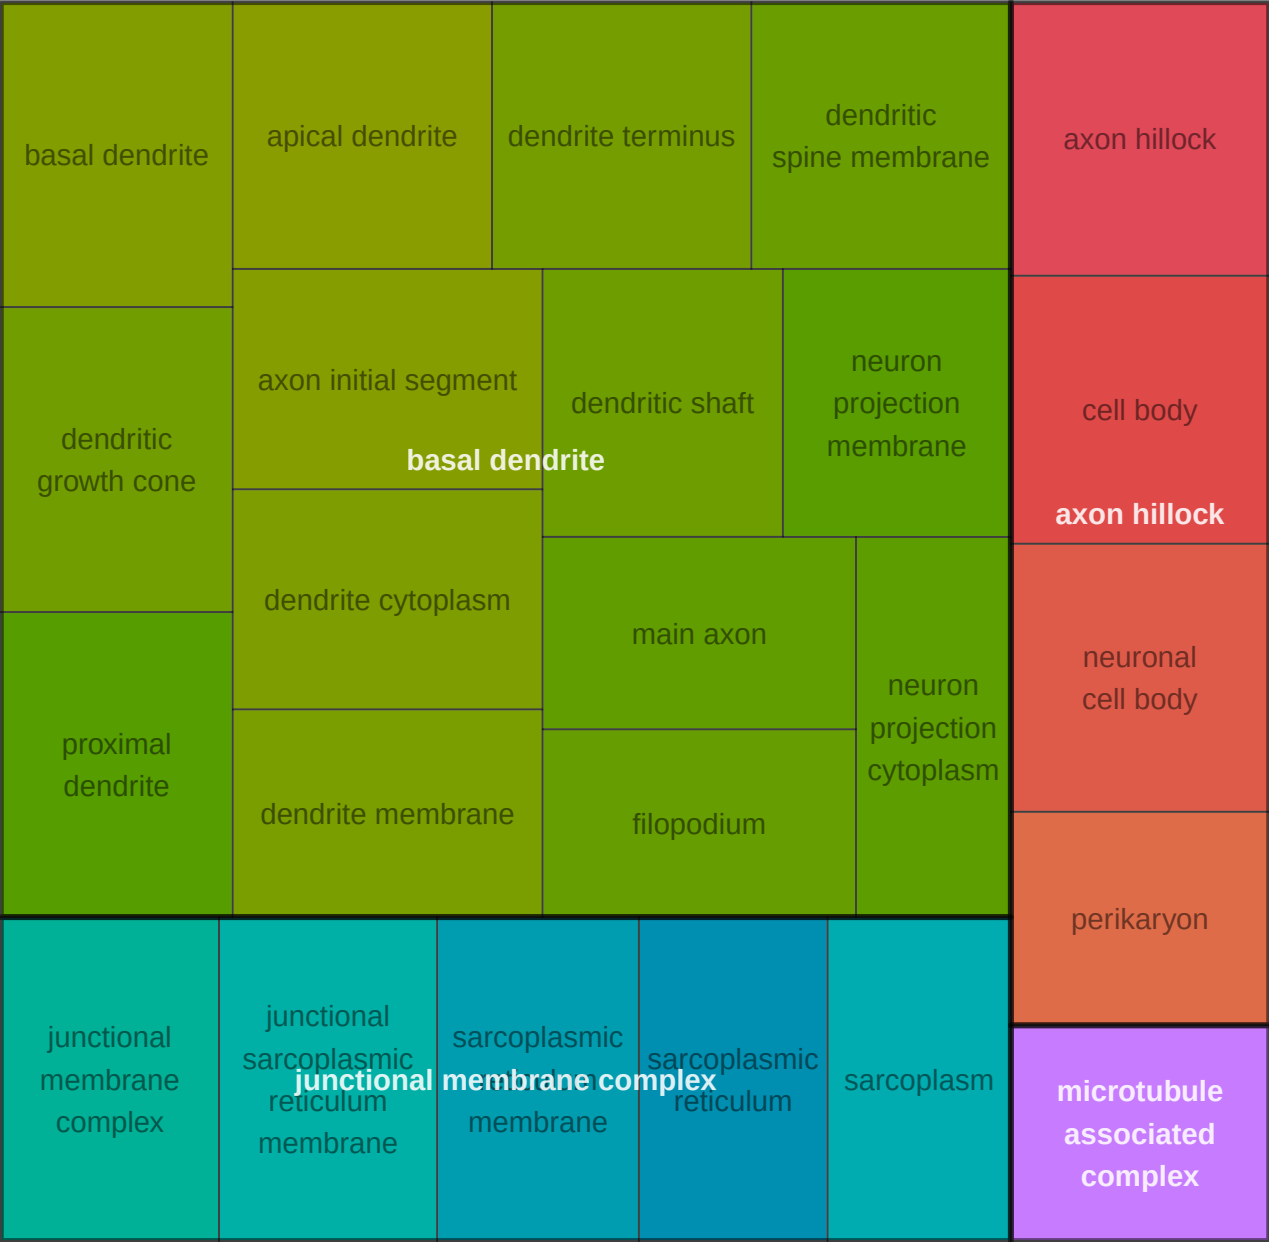

cyclin-dependent protein
serine/threonine kinase activity

cyclin binding

dystroglycan binding

tau protein binding

vWMuf_up_ALL CC

vWMuf_up_ALL BP
