anterograde neuronal dense core vesicle transport	regulation of synaptic vesicle transport	synaptic vesicle transport along microtubule	dense core granule localization	secretory granule localization	regulation of organelle transport along microtubule	microtubule polymerization	regulation of microtubule polymerization	microtubule polymerization or depolymerization
dense core granule cytoskeletal transport	anterograde synaptic vesicle transport	synaptic vesicle transport	synaptic vesicle localization	vesicle cytoskeletal trafficking	regulation of microtubule-based movement	microtubule polymerization or depolymerization	microtubule cytoskeleton organization	regulation of microtubule-based process
dense core granule transport	synaptic vesicle cytoskeletal transport	vesicle transport along microtubule	establishment of vesicle localization	vesicle localization	negative regulation of developmental growth	axon extension	central nervous system neuron development	negative regulation of nervous system development
anterograde axonal transport	organelle transport along microtubule	potassium ion transmembrane transport	transport along microtubule		negative regulation of cell growth	neuron projection	central nervous system neuron development	
axo-dendritic transport	positive regulation of intracellular transport	potassium transport	microtubule-based transport		negative regulation of growth	growth involved in morphogenesis		
axonal transport	cytosolic transport	cytoskeleton-dependent intracellular transport	regulation of intracellular transport		developmental cell growth	regulation of developmental growth	central nervous system neuron differentiation	dendrite development
negative regulation of microtubule polymerization	negative regulation of axonogenesis	negative regulation of protein polymerization	negative regulation of protein-containing complex assembly	regulation of axonogenesis	regulation of microtubule binding	negative regulation of protein binding	regulation of axon extension	
negative regulation of axon extension	negative regulation of microtubule polymerization or depolymerization	negative regulation of neuron projection development	negative regulation of supramolecular fiber organization	negative regulation of cell projection organization	regulation of microtubule binding		regulation of extent of cell growth	
					regulation of protein binding	regulation of binding	regulation of protein polymerization	

calcium-activated potassium channel activity	calcium-activated cation channel activity	inward rectifier potassium channel activity	dystroglycan binding
monoatomic ion-gated channel activity	ligand-gated monoatomic ion channel activity	potassium channel activity	
calcium-activated potassium channel activity	potassium ion transmembrane transporter activity		
ligand-gated channel activity	voltage-gated channel activity	voltage-gated monoatomic ion channel activity	
ligand-gated monoatomic cation channel activity	voltage-gated monoatomic cation channel activity	voltage-gated potassium channel activity	tau protein binding
calmodulin binding			

tau protein binding

calmodulin binding
