

Astro-1_up CC

G protein-coupled receptor complex

postsynaptic membrane

GABA receptor complex

synaptic membrane

GABA receptor complex

synaptic membrane

Astro-1_up BP

negative regulation of
adenylate cyclase activity

negative regulation of lyase activity

negative regulation of lyase activity

regulation of
adenylate cyclase
activity

**gamma-aminobutyric
acid signaling pathway**

synaptic vesicle docking

synaptic vesicle docking

vesicle docking
involved in exocytosis

lipid import into cell

Astro-1_up MF

Astro-2_up MF

Astro-3_down CC

myelin sheath

myelin sheath

compact myelin

Astro-3_down BP

axon ensheathment

ensheathment of neurons

iron ion
transport

myelination

**iron ion
transport**

myelination

myelin assembly

regulation of
vesicle-mediated
transport

substantia nigra development

Astro-3_up CC

plasma membrane signaling
receptor complex

GABA receptor complex

plasma membrane signaling receptor complex

G protein-coupled receptor complex

receptor complex

neuronal
cell body

synaptic membrane

synaptic membrane

postsynaptic membrane

Astro-3_up MF

acetylcholine receptor activity

G protein-coupled
neurotransmitter
receptor activity

G protein-coupled
receptor activity

GABA receptor activity

G protein-coupled amine
receptor activity

GABA receptor activity

**protein
tyrosine
kinase
activator
activity**

phosphatidylinositol
phospholipase C activity

phospholipase C activity

phospholipase C activity

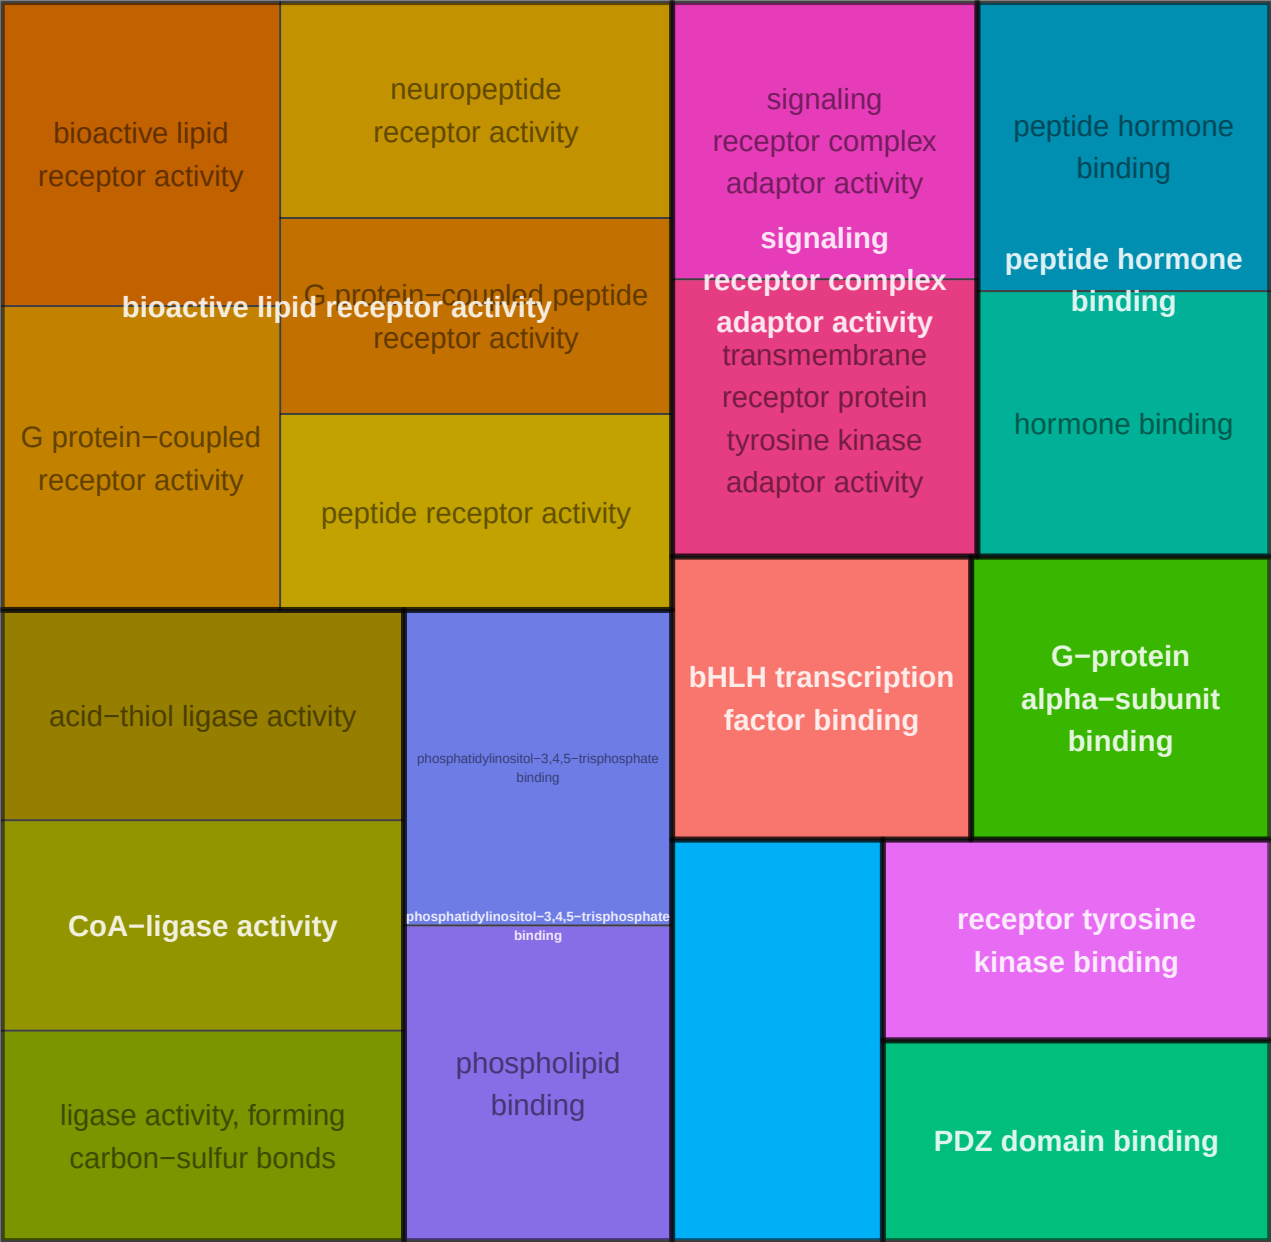

Excit-L2_5-mix_down CC

dendritic spine

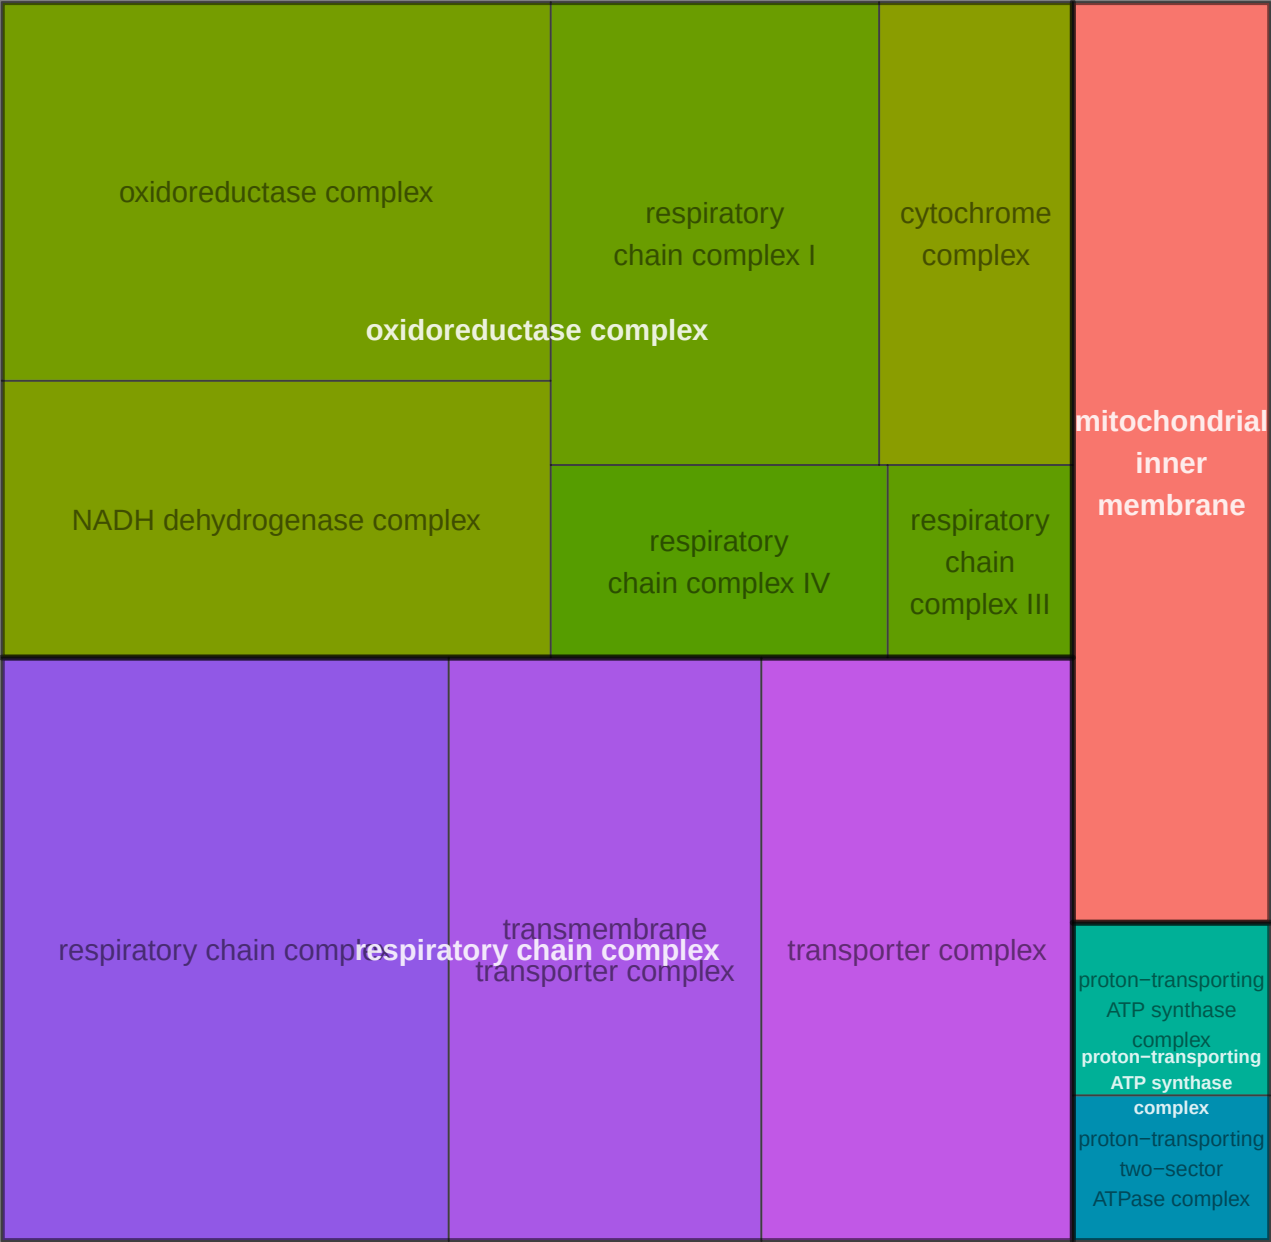

neuron spine

neuron spine

Excit-L2_5-mix_down MF

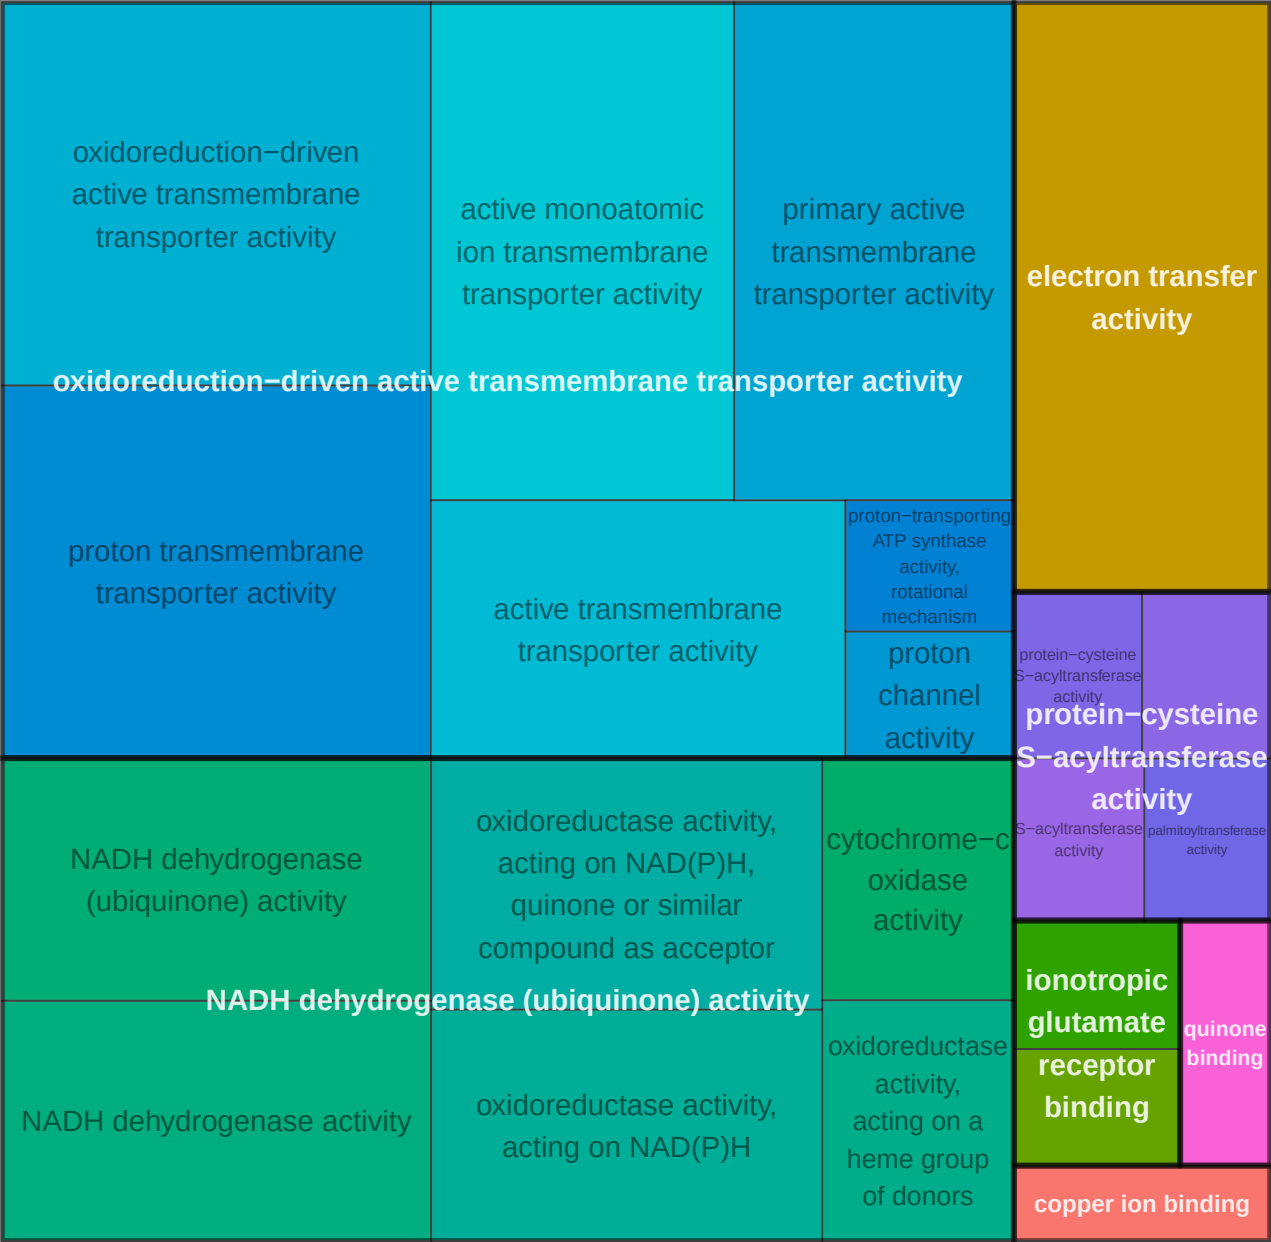

Excit-L2_5-RELN_down CC

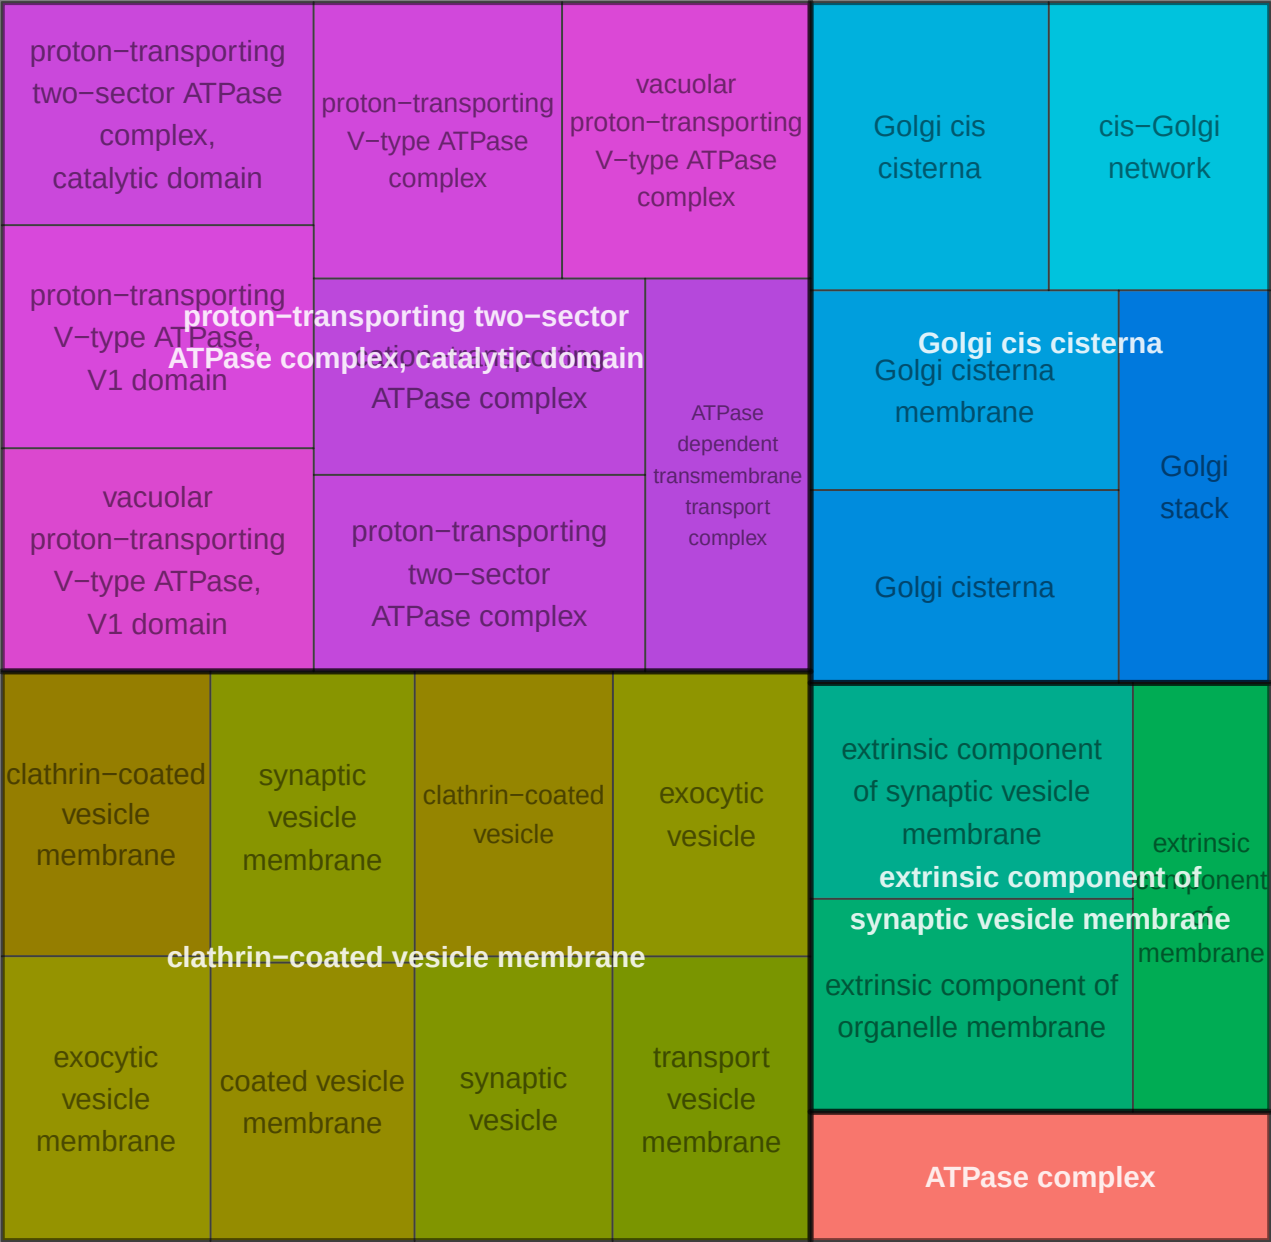

Excit-L2_5-RELN_down BP

proton motive force-driven mitochondrial ATP synthesis	purine ribonucleoside triphosphate biosynthetic process	ribose phosphate biosynthetic process	ATP metabolic process	nucleotide biosynthetic process	response to oxygen levels	response to decreased oxygen levels	
proton motive force-driven ATP synthesis	ribonucleoside triphosphate biosynthetic process	purine ribonucleoside triphosphate metabolic process	nucleoside triphosphate metabolic process	nucleoside phosphate biosynthetic process	response to hypoxia	response to hyperoxia	
proton motive force-driven mitochondrial ATP synthesis						response to increased oxygen levels	
ATP biosynthetic process	nucleoside triphosphate biosynthetic process	purine nucleoside triphosphate metabolic process	purine ribonucleotide metabolic process	ribose phosphate metabolic process	purine ribonucleotide biosynthetic process		
				purine nucleotide metabolic process			
purine nucleoside triphosphate biosynthetic process	ribonucleotide biosynthetic process	ribonucleoside triphosphate metabolic process	ribonucleotide metabolic process	nucleotide metabolic process			
oxidative phosphorylation		ATP synthesis coupled electron transport	cellular respiration		mitochondrial respiratory chain complex I assembly		proton transmembrane transport
aerobic electron transport chain		mitochondrial ATP oxidative phosphorylation	cellular respiration by oxidation of organic compounds				
aerobic respiration		respiratory electron transport chain	generation of precursor metabolites and energy		mitochondrial electron transport, NADH to ubiquinone		
				mitochondrial electron transport, cytochrome c to oxygen	mitochondrial respiratory chain complex assembly		lactation
					response to ethanol	response to copper	
					response to xenobiotic stimulus	response to cadmium ion	
					response to alcohol		response to oxidative stress
							positive regulation of defense response to virus by host

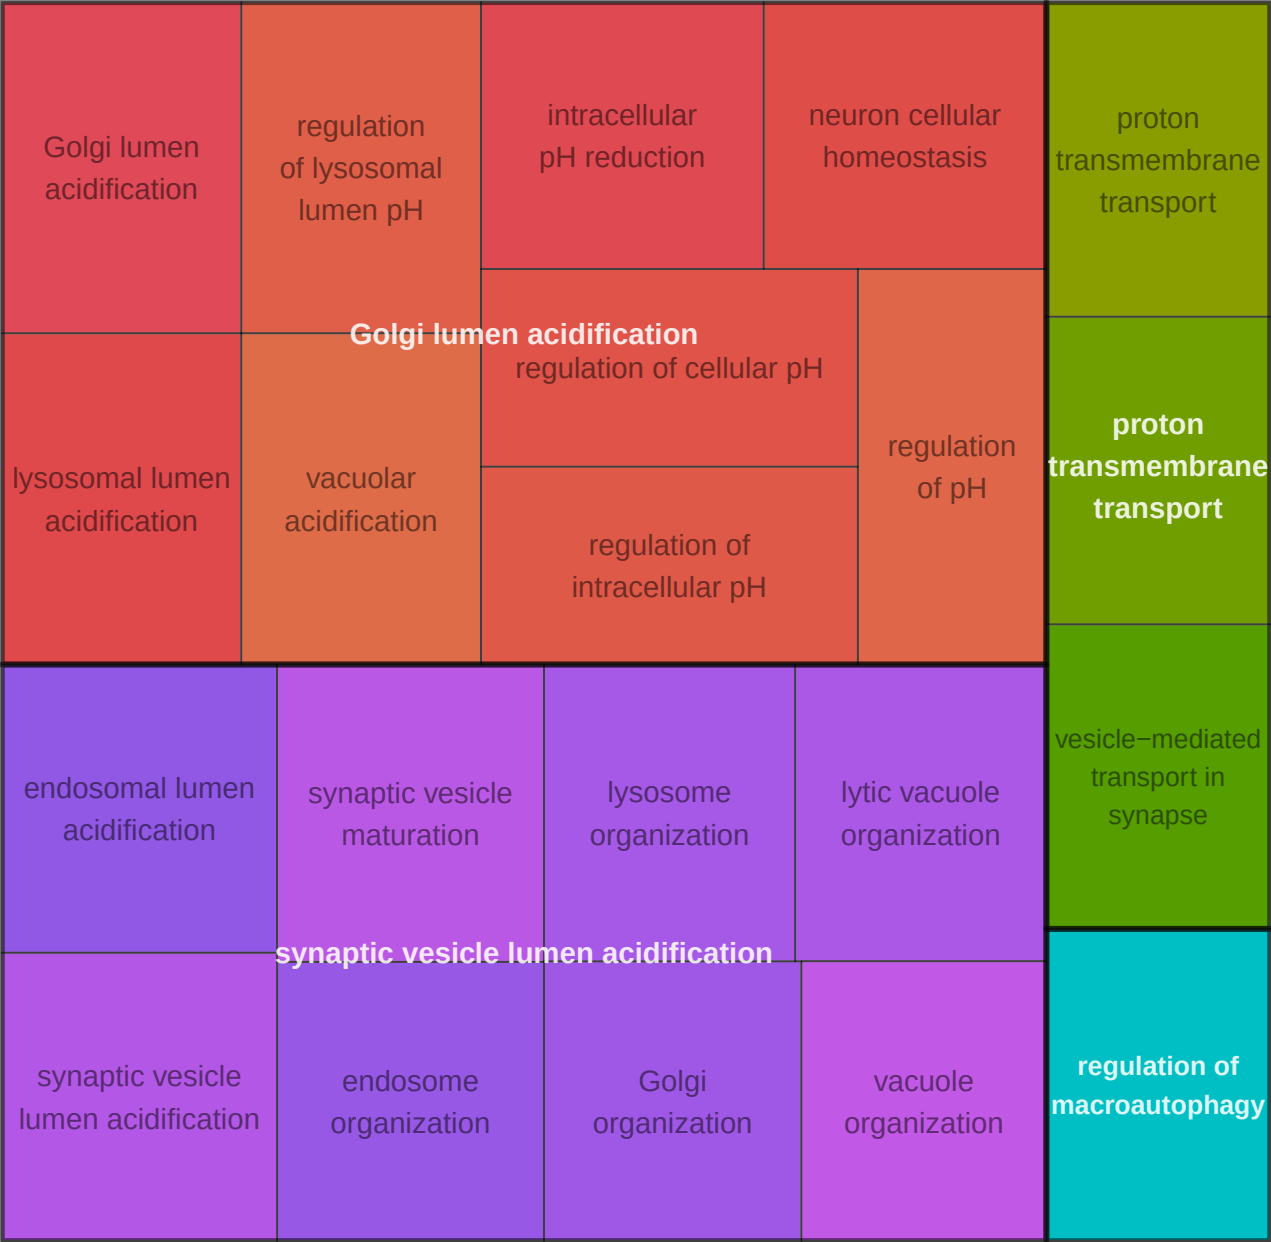

Excit-L2_5-RELN_down MF

Excit-L2_5-RELN_up CC

Excit-L2_5-RELN_up BP

Inhib-SST_down CC

cytosolic large ribosomal subunit

large ribosomal subunit

cytosolic ribosome

ribosomal subunit

cytosolic ribosome

ribosome

Inhib-VIP_down BP

axon ensheathment in
central nervous system

axon ensheathment in central nervous system

Macro_down CC

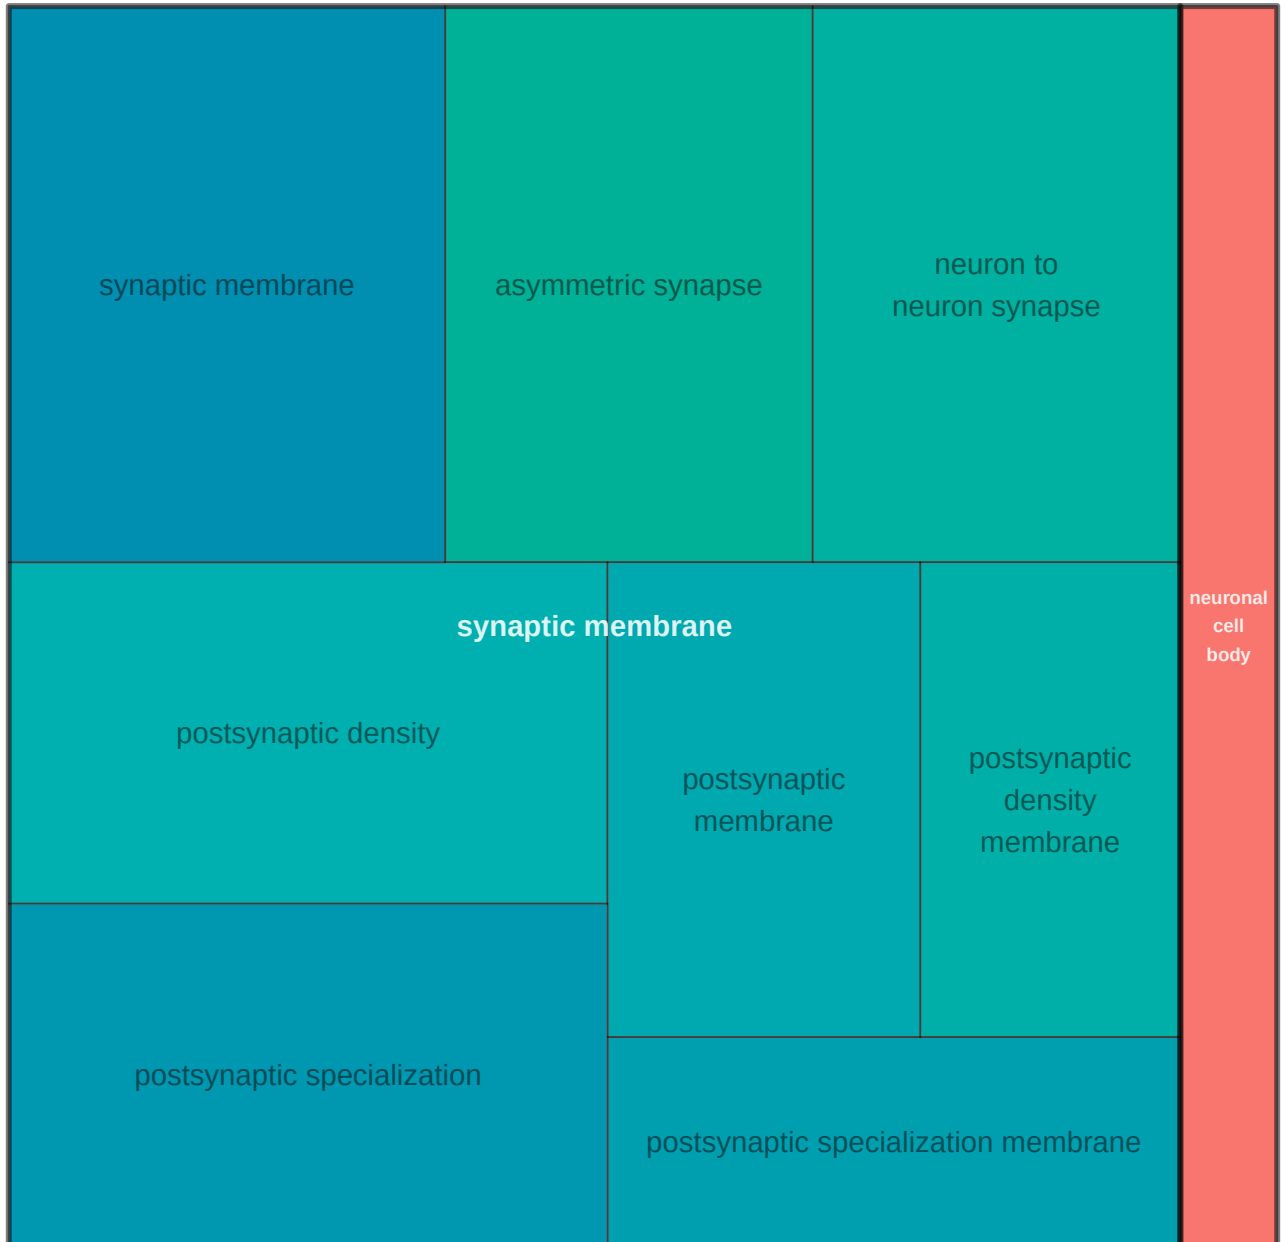

Macro_down BP

Macro_down MF

Micro-4_up CC

Micro-4_up BP

modulation of chemical
synaptic transmission

regulation of trans-synaptic signaling

regulation of trans-synaptic signaling

Oligo-3_down CC

Oligo-3_down BP

axon ensheathment

myelination

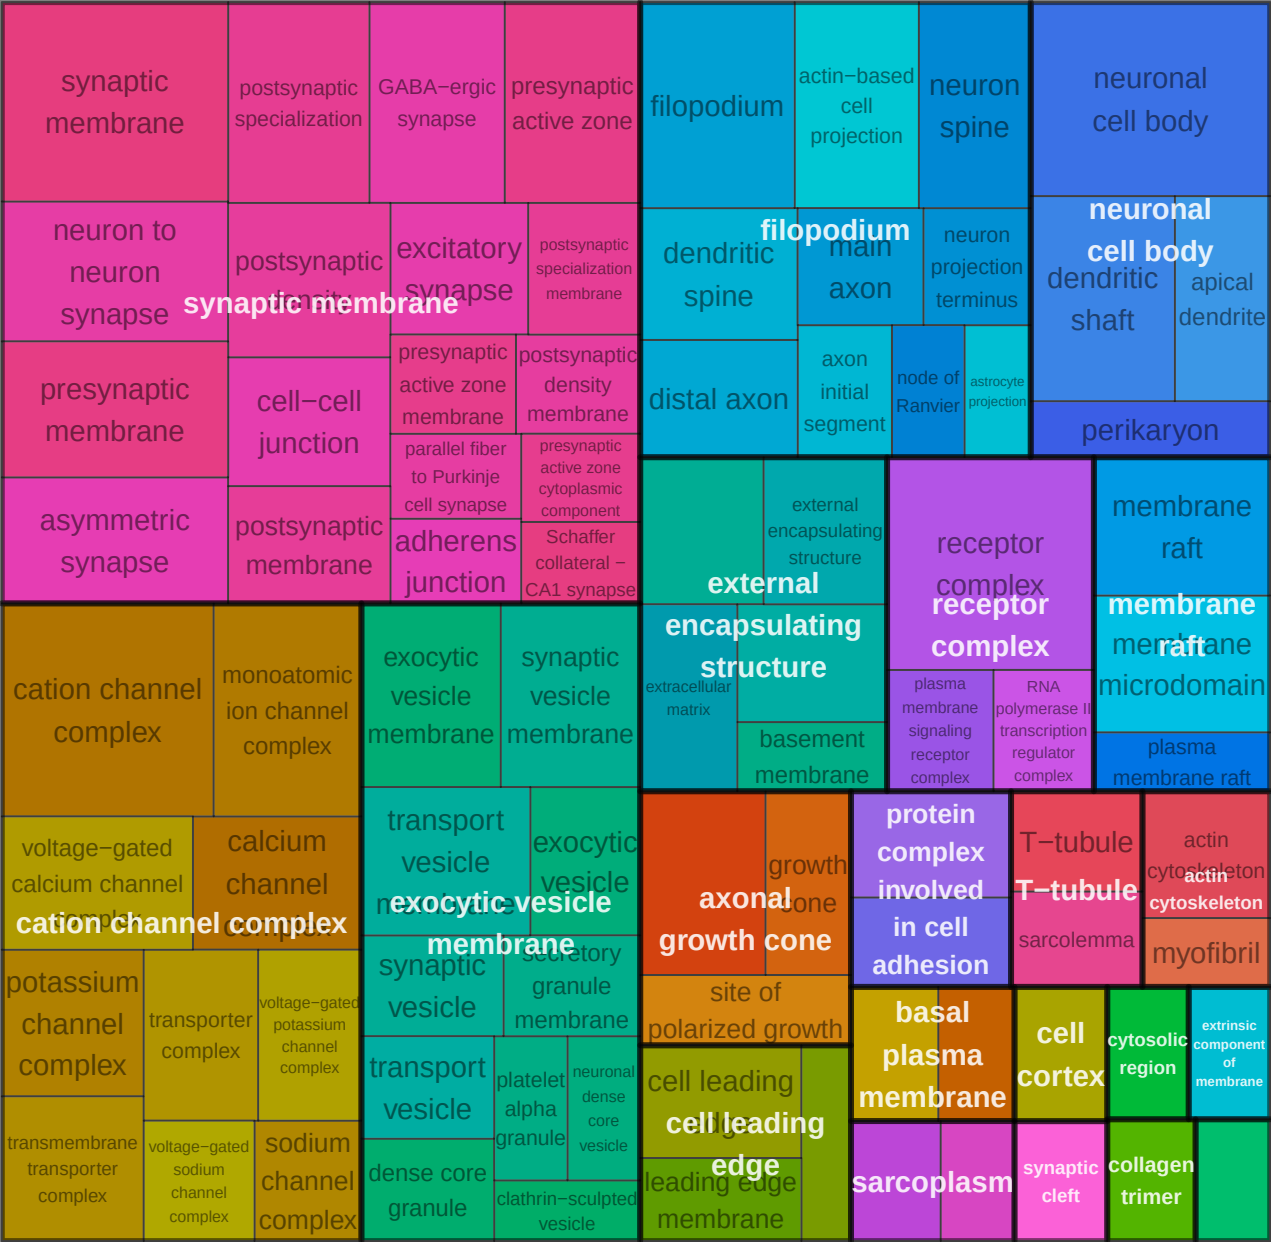

myelination

oligodendrocyte development

ensheathment of neurons

oligodendrocyte differentiation

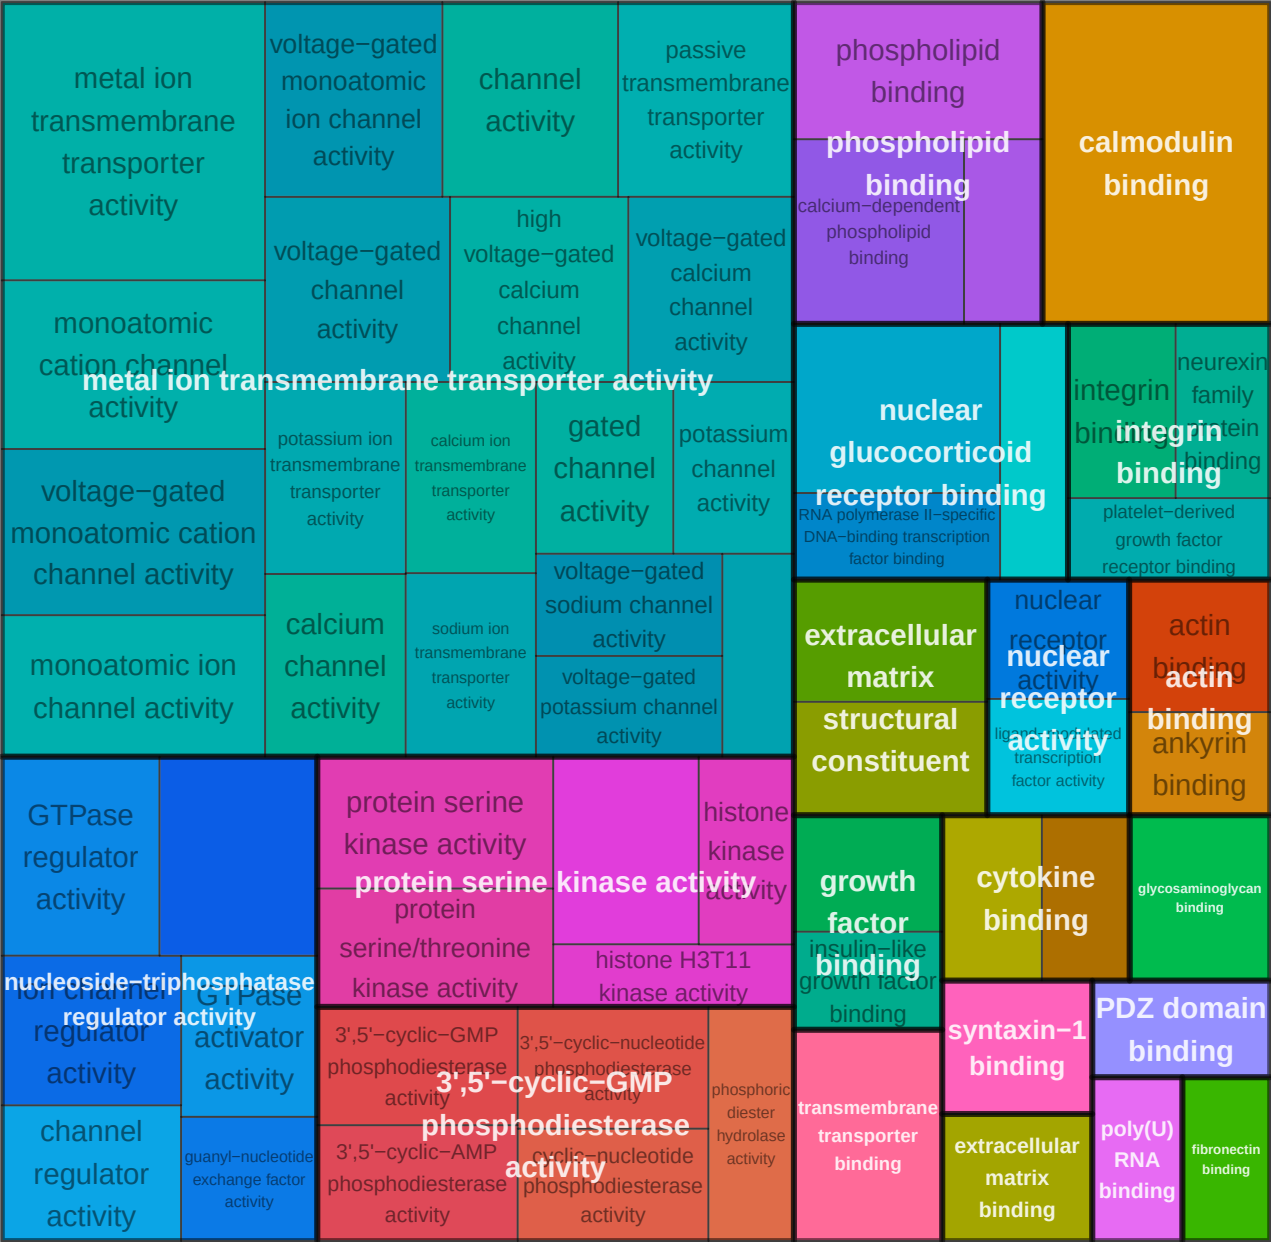

Oligo-3_up CC

Oligo-3_up BP

Oligo-3_up MF

Oligo-5_down MF

phosphatidic acid binding

phosphatidylinositol-3,4,5-trisphosphate binding

ATP hydrolysis activity

phosphatidylinositol-3,4-bisphosphate binding

phosphatidylinositol-3,4-bisphosphate binding

phosphatidylinositol-3,5-bisphosphate binding

microfilament motor activity

channel inhibitor activity

sodium channel regulator activity

ion channel inhibitor activity

sodium channel regulator activity

neuropeptide receptor activity

racemase and epimerase activity

Oligo-5_up CC

membrane microdomain

membrane microdomain

membrane raft

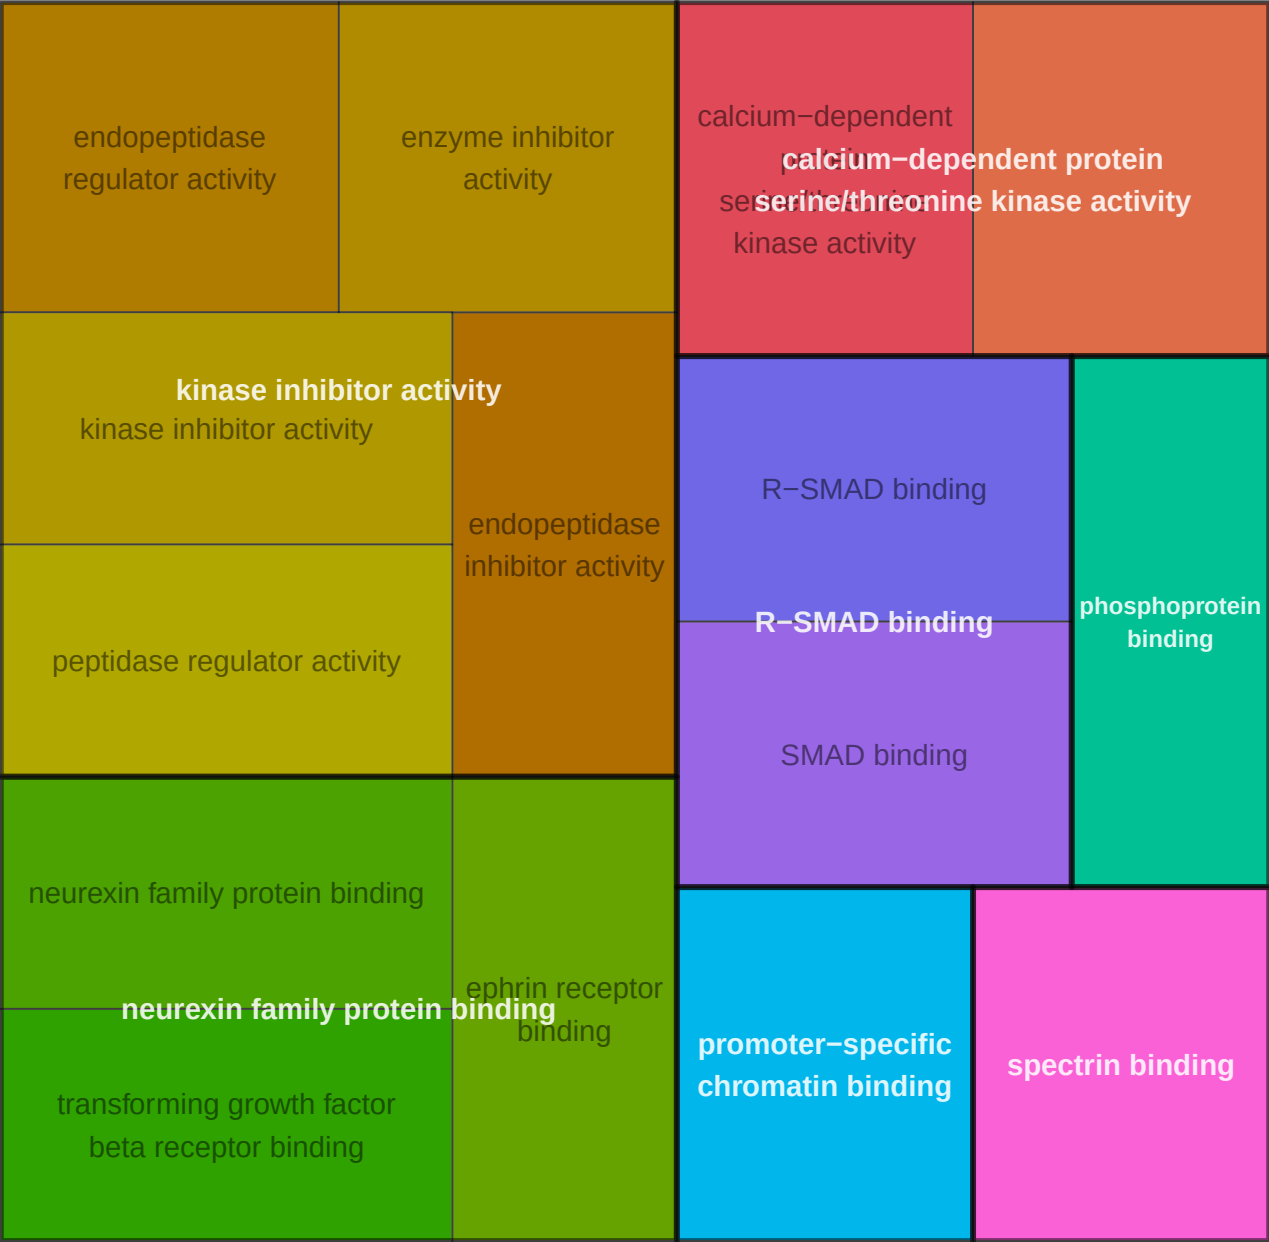

immunological synapse

Oligo-5_up BP

Oligo-5_up MF

Vasc-VLMC_down MF
